CONSTRUCTION

- Construction Materials:** **Cabinet:** .080 aluminum.
Hood, Access Door and Bottom: .080 Aluminum
Faceplate: The faceplate, weather shroud, depository opening and envelope dispenser door are made from Stainless Steel and aluminum.
Inside Support Base: Three piece heavy duty galvanized steel.
Chute: Galvanized
- Construction Methods:** **Cabinet:** One piece of Aluminum forms all four corners of the cabinet.
Access Door Header: Welded in place
Hood: One-piece top, sides, and rear. Faceplate welded in place. Fully sealed to prevent leaking.
Bottom: Full aluminum welded to frame.
Safe: Constructed with 1/8" thick solid steel to resist hand and mechanical tool tampering. Powder coated interior and exterior. Is mounted to the base with four heavy duty anchor bolts which go through to the cabinet bottom and into your concrete pad.

FEATURES

- Weather Resistance:** No corner seams to leak or pull apart in heavy winds or under weight of snow. Sealed access door. The depository opening is protected with a built in weather shroud. Sloped and radius top to help shed water.
- Safe:** 1/8" thick Steel safe. "B" Rated Burglary Construction. Inside dimensions 14-3/4"L x 12"W x 19-3/4"H [374.65mmL x 304.80mmW x 501.65mmH]. 1/2" solid steel door. Door thickness 3". Group II combination lock. 1-1/4" Massive Chrome Plated Solid Steel Live Locking Bolts.
- Envelope dispenser:** The Envelope Dispenser compartment with a sliding door is built into the faceplate.
- Theft Deterrence:** The built in theft deterrent system makes removing articles through the depository opening virtually impossible.
- Fire Suppression:** Air tight design smothers most fires in under 1 minute
- Finish:** Standard finishes with a Graffiti-X clear coat option. See website for complete list.
