COLOR AVAILABILITY

- **Medication Disposal**
- **Sharps Disposal**
- **Medical Waste**
- **Document Disposal**
- **Donation Collection**
- **Emergency Medication Access**
- **Medication Recycling Programs**

Prescription Medication Drop-Off: Allow patients to safely dispose of unused or expired medications, promoting proper medication management and preventing misuse.

Sharps Disposal: Provide a secure and designated location for the disposal of sharps such as needles and lancets, ensuring safe handling and minimizing the risk of needlestick injuries.

Medical Waste Collection: Enable healthcare facilities to collect and safely dispose of non-hazardous medical waste, contributing to a clean and hygienic environment.

Document Disposal: Safeguard patient confidentiality by offering a secure way to dispose of sensitive medical documents and records, complying with privacy regulations.

Donation Collection: Facilitate the collection of medical supplies, equipment, or donations for charitable organizations or community health initiatives.

Emergency Medication Access: Install drop boxes in public spaces or community centers for the secure storage of emergency medications like epinephrine auto-injectors or naloxone kits, providing quick access during critical situations.

Medication Recycling Programs: Support environmentally friendly practices by encouraging the return and recycling of packaging materials from medications or medical products.

FEATURES & BENEFITS

Durable rust-free aluminum

All our outdoor returns are made from an aircraft grade aluminum alloy that is stronger than comparable gauge stainless steel as well as more dent resistant. Aluminum will never rust or corrode like traditional steel keeping your unit structurally sound. It will also never streak or discolor like stainless steel. This makes our returns hold up better in coastal areas.

Drive-up and ADA Compliant for Walk-ups

All Kingsley outdoor depositories are 53" in height so they can be used for drive-up deposits from all vehicles including SUVs and trucks. They are also ADA Compliant for walk-up deposits when properly installed. Braille plates are available for purchase. Our proprietary KwikDrop depository openings allow for one-hand deposits making it easy to deposit items no matter how your patrons decide to.

Beautiful powder coat sealed with an anti-graffiti finish

Each unit comes in your choice of 11 different standard powder coat finishes. We top that with an anti-graffiti clear coat that allows you to easily remove paint and marker with solvents. This coat provides a brilliant finish with UV protection against fading in addition to scratch resistance, keeping your unit looking new for years to come.

Weather Resistant, Theft Deterrent, & Fire Suppressant

No matter what is thrown at your depository, it's made to stand up to it all. Units come standard with several weather-resistant features. Fully sealed seams and our unique depository openings are designed to keep water out. New units come with a pre-installed access door drip rail that is powder coated the same color as your unit to protect the top of the door from water and snow. All outdoor units have fully ramped bottoms to keep deposited items above the ground and any water on it. Our key paddle locks cover the actual lock to keep it safe from ice and debris. If that's still not enough, magnetic closure kits can be purchased to keep depository flaps closed during heavy winds and storms.

We take the security of your items seriously and have built our outdoor returns to be theft deterrent and vandal resistant. Depository openings and chutes are constructed to prevent thieves from pulling anything out. Our unique inter-locking seams are designed to prohibit them from being pried apart. Every door is attached with a full-length piano hinge and secured on the other three sides with a commercial grade three-point latching lock so you can be confident that it will stay shut. Units are also fire suppressant with the ability to smother a flame in roughly a minute.

Customization options are endless

We know that one size never fits all and personal touches are important. All our outdoor depositories have a 360° rotatable hood, so you can place your opening and access door in any configuration you need to fit your space. Our standard vinyl decals include options for wording and graphics so people can properly identify the purpose of your unit. We also take orders for custom powder coat colors, wording, and graphic decals. Fill out our custom unit request form and we'll be happy to give you a quote for your custom unit.

Environmentally Conscious

All Kingsley Outdoor Returns hoods, cabinets, and carts are constructed of up to 85% recycled aluminum alloy and are 100% recyclable. Our powder coating process allows no pollutants or hazards to enter the environment. There are no harmful toxins used throughout the manufacturing process.
